

JOSÉ GIMÉNEZ

TELECOM
ENGINEER

629 872 482

jgimenez.it@gmail.com

www.jgimenez.es

Málaga On-site

Hybrid or Fully remote

PERSONAL STATEMENT

Specialized in IT systems architecture, communications, cybersecurity, virtualization, auditing and monitoring. Highly experienced in team and project management, as well as service administration and development. Data center (DC) and IT infrastructure management.

Member of Colegio Oficial de Ingenieros de Telecomunicación, Instituto de Ingeniería Española, ISACA and LPI

EDUCATION, CERTIFICATIONS & LICENSES

- 1999 **TELECOMMUNICATIONS ENGINEER (MECES 3, EQF 7)**. Specialty in Communications. Specialty in Telematics
- 2013 **CISA**. Certified Information Systems Auditor by ISACA
- 2023 **LPIC2**. Linux Professional Institute Certification, level 2
- 2025 **RHCSA**. Red Hat Certified System Administrator v9

EMPLOYMENT HISTORY

2016 Head of IT

MONTERO ARAMBURU. Madrid, Sevilla, Málaga, Canarias

Fractional CIO / CTO / CISO Role: Acting as the primary strategic lead for technology, innovation, and security.

Business Continuity Management: Ensuring 24/7 mission-critical service availability for 400+ users across 9 sites.

Systems Architecture & Service Deployment: Designing scalable infrastructure and leading the end-to-end implementation of new enterprise services.

IT Department Leadership: Managing a team of 12; established a clear delegation framework and role-based accountability.

Financial Oversight & Procurement: Managing IT budgets, including RFP/RFQ processes and contract negotiations.

Vendor Management: Orchestrating partnerships with Telco carriers, system integrators, software developers, and hardware suppliers.

IT Governance & Compliance: Leading information security audits and ensuring strict adherence to GDPR and internal regulatory frameworks.

Key Technical Projects

Data Center Construction: Spearheaded the build-out of a 60kW facility including UPS (SAI), CRAC units, CCTV, and Fire Suppression Systems (PCI).

Enterprise Network Redesign: Architected a robust network featuring perimeter security, IPAM, core switching, and SD-WAN integration.

Unified Communications (UC): Implemented VoIP and unified communication solutions to enhance collaboration.

Office Infrastructure Fit-outs: Managed IT setups for 100-user offices, including structured cabling, enterprise WiFi, and 4G/5G connectivity.

VDI Implementation: Deployed Virtual Desktop Infrastructure using VMware Horizon with Instant Clone technology for optimized performance.

Cloud Transformation & ERP/CRM: Led the migration from legacy/local systems (Zimbra, Sage) to Microsoft 365 and Entra ID; deployed Dynamics 365 BC and CRM.

Azure Cloud Management: Managing cloud-native services and resource governance within the Azure ecosystem.

Cybersecurity & Threat Mitigation: Driving ransomware prevention strategies, security awareness training, and comprehensive IT security policies.

2008 - 2016 IT Manager

MUSEO PICASSO MÁLAGA. Málaga

Department Establishment & Leadership: Formed and directed a team of 5, overseeing the internalization of IT services to improve operational control.

Helpdesk Management & ITIL Framework: Established a dedicated Helpdesk area and implemented ITIL best practices to streamline service delivery.

Budgetary & Procurement Management: Managed IT budgets, including public tenders, government contracting, and the drafting of technical specifications.

Infrastructure Optimization: Upgraded ICT architecture (Data Center, servers, and IP networks); responsible for the maintenance and renewal of 125 workstations and 20 servers.

Information Security Officer: Acting Lead for Information Security compliance, including Spanish Organic Law on Data Protection (LOPD), ISO 27001, ENS (National Security Framework), and MAGERIT risk analysis.

Key Technical Projects

Server Virtualization: Successfully virtualized Windows Server environments using VMware to optimize resources.

On-Premise Messaging Services: Managed local Exchange server (150 accounts) including OWA administration.

Web Server Administration: Managed Linux-based server environments hosting corporate websites.

ERP & Collaboration Implementation: Led the roll-out of Microsoft Dynamics Navision and SharePoint to automate and manage business processes.

2014 Technical writer

IC EDITORIAL. Málaga

Author of "Seguridad en Equipos Informáticos" (ISBN 978-84-16271-11-5): Developed this textbook as part of the official "Cybersecurity" Professional Certification (Spanish Royal Decree 1087/05).

Expertly synthesized complex security frameworks into instructional materials, covering: Business Impact Analysis (BIA) and Risk Management & Assessment, Data Protection & Privacy, Systems Security: guides on Physical and Logical security, System Hardening, and Firewall configuration.

2004 - 2008 IT Systems Administrator

MUSEO PICASSO MÁLAGA. Málaga

IT Service Delivery & Maintenance: Ensuring seamless ICT service availability for a 100-user environment.

Multi-platform Helpdesk Support: Providing technical support for PC, Macintosh, and peripherals; managing incident logging, Knowledge Base (KB), and CMDB.

Development & Data Management: Software programming (ASP, Visual C++) and data exploitation with SQL Server.

Windows Server Administration: Managing Active Directory (AD) environments and network permissions.

Network Operations: Ethernet networks, including structured cabling, switching, routing, and firewall administration.

Voice & Telephony Management: Administering fixed-line services (Ericsson PBX, IVR/RVI) and telecommunications cost control, including V.35 and ISDN (RDSI).

Mobile & WAN Connectivity: Managing mobile fleet (GSM, UMTS, LTE) and WAB connections (ADSL, LMDS, WAN).

Infrastructure Support: Providing technical oversight for CCTV, alarm systems, access control, and AV equipment.

POWERBI, MS
PROJECT, AUTOCAD,
PRESTO, MATLAB,
SIMULINK

2003 Freelance

Software Development (C & MATLAB): Designing and implementing specialized algorithms and technical applications using C and MATLAB.

ICT Project Designer: Drafting comprehensive technical projects and leading site management for telecommunications infrastructure.

University-Level Instructor: Delivering lectures and developing educational materials for university-level subjects.

Technical Projects

C Software Development: Designed and implemented an Outdoor Acoustic Propagation Simulator using C for high-accuracy sound modeling.

ICT Engineering & Compliance: Drafting and official certification of construction projects for telecommunications infrastructure, including: TV and Satellite (TV-SAT) reception and distribution systems, Telephony ISDN, and Common Telecommunications Infrastructure.

Technical Instructor (University Level): Delivering specialized lectures in Mathematics (Discrete Mathematics, Linear Algebra, and Calculus), Software Engineering (Programming Methodology C/C++, Abstract Data Types, and Java) and Industrial Automation (Programmable Logic Controllers focused on Siemens systems).

2000 - 2002 Product Development Engineer

SITRE TELECOM. Madrid

PCB Design & Prototyping: Leading the design, prototyping, and testing of Printed Circuit Boards (PCBs) for communications and high-power electronics (up to 10kW).

Component Selection & Customization: Expertise in the selection and integration of electronic components, including semi-custom and turnkey system solutions.

Energy Storage Systems (ESS): Designing and managing energy accumulation systems for renewable power generation, specifically with solar panels and wind turbines.

Technical Documentation & Compliance: Drafting comprehensive technical documentation and conducting on-site technical reviews of client installations.

Technical Projects

International Defense Project: Key contributor to a large-scale military project developing a national communications network (fixed and mobile), including the field deployment of radio communication towers.

1998 Academic Lecturer

UNITEC. Málaga

Teaching **Advanced Computer Programming** and **Discrete Mathematics** at the University level.

CONTINUING EDUCATION & SPECIALIZED TRAINING

Postgraduate & Executive Education:

- Professional Expert in IT Service Management (ITIL & ISO 20000) – (500h) UNED, 2008
- University Expert in Business Management & Administration – (300h) University of Almería, 2000

Core Technical & Security Training:

- Information Security & IT Auditing (CISA/CISM/CISSP Alignment) – (100h) COIT, 2012
- Project Management (PMP Certification Alignment) – (80h) COIT, 2012
- AZ-104: Microsoft Azure Administrator – (60h) PUE DATA, 2024
- Ethical Hacking & Digital Forensics: Ethical Hacking – (56h) COIT, 2016. Digital Evidence: Acquisition, Analysis, and Presentation – (56h) COIT, 2017
- Big Data & Data Science: Business Strategy and Fundamentals – (64h) COIT, 2016

Cloud, Development & Infrastructure:

- Python 3 Programming – (55h) Udemy, 2023
- SQL & NoSQL Databases – (80h) COIT, 2019
- C# Programming & .NET Platform – (120h) UNED, 2004
- Windows Server: Network Infrastructure Implementation – (50h) CEA Málaga, 2007
- IT Law & New Technologies – (50h) CEA Málaga, 2007

Technical Workshops & Short Courses (<50h):

- Cybersecurity & Automation: Linux Server Hardening, SELinux Masterclass, Offensive Cybersecurity & Pentesting with PowerShell, Nagios Monitoring, Ansible Automation (Beginner to Expert)
- Networking & Infrastructure: Cisco CCNA (Networking Fundamentals), Fiber Optic Network Deployment, Network Functions Virtualization (NFV) & Software-Defined Networking (SDN)
- Systems & Scripting: Active Directory Administration with PowerShell, PowerShell v5.1/6 Mastering
- Business Strategy: IT as a Strategic and Competitive Weapon (IESE Business School), ITIL Foundation
- Legacy & Web Development: Java for Internet, Web Design & Multimedia Content

SKILLS

English, upper-Intermediate (B2)

- Professional Proficiency: Experienced in handling technical correspondence and business meetings on a weekly basis
- First Certificate in English (FCE): Level B2, University of Cambridge (2015)
- Spoken English: Grade 4 with Honours, Trinity College London
- Preliminary Certificate: London Chamber of Commerce and Industry

Programming Languages

- Assembler x86/680xx, Basic, Modula2, C, C++, Java
- ASP, Javascript, PHP
- Bash, Powershell, Python 3

Additional Expertise

- Specialized in AI and Computer Vision for autonomous robotics; authored the 1999 runner-up for best Final Degree Project on 'Pattern Recognition for the NOMAD platform'
